00:00:02 Speaker 1

Okay, I mean, Conrad, if you already have something, that would be helpful.

00:00:09 Speaker 1

Otherwise, because if you already have anything, your version is going to be much more trustworthy as compared to what we'll be generating.

00:00:20 Speaker 1

So I get it.

00:00:21 Speaker 2

I get it.

00:00:22 Speaker 2

So let me tell you the history.

00:00:24 Speaker 2

The SQL scripts that I have are based on my toast.

00:00:30 Speaker 2

the existing data flow definition files.

00:00:35 Speaker 2

And I created those definition files before K+ even had formats.

00:00:45 Speaker 2

We didn't have any formats to speak of before Jim came to work here.

00:00:50 Speaker 2

And then for years and years, they were incomplete or inaccurate.

00:00:57 Speaker 2

And then finally,

Just what, Jim, the last two or three years, four years, five years, maybe they they've been cleaned up.

00:01:07 Speaker 2

So now the formats are reliable.

00:01:12 Speaker 2

However, they're different than the SQL scripts that I have for the old version of Dataflow.

00:01:21 Speaker 2

So anyway,

00:01:27 Speaker 2

I can come up with a quick script to create SQL create statements, and I think this is back to where we were talking Tuesday or Wednesday.

00:01:44 Speaker 2

I can create the SQL create statements from the format, but.

00:01:52 Speaker 2

I'm going to have to write a script to do that.

00:01:55 Speaker 2

So that's why I say it would be Monday before I got that to you.

00:02:00 Speaker 2

But what we really need, we need to talk to Susan.

00:02:05 Speaker 2

What is the scope?

00:02:06 Speaker 2

Where are we starting?

00:02:07 Speaker 2

What we're not going to convert all of the PayPlus data into the web app.

00:02:13 Speaker 2

We're just absolutely right.

00:02:16 Speaker 1

So this quote will never do that.

00:02:18 Speaker 2

We need to say, okay, the scope of phase one

00:02:22 Speaker 2

is we're going to do payroll entry and then we need to discuss among ourselves what do we need to do payroll entry, right?

00:02:33 Speaker 1

Right.

00:02:34 Speaker 2

OK.

00:02:36 Speaker 1

So I'm completed with you and the way I understand this, the scope of the current application, I think it's.

00:02:47 Speaker 1

No, I think I know for sure it is restricted or is limited by the scope of the 360 application, the web application which is available out there.

00:03:02 Speaker 1

So anything and everything we see on the user interface, we should be able to capture the same amount of data or similar data into our system.

00:03:13 Speaker 1

That is the objective.

00:03:16 Speaker 2

OK.

00:03:20 Speaker 2

See, I don't know what I have not been involved in all of the meetings where we went through 360 with you and said this is where we need to start.

00:03:32 Speaker 2

This is what we need to do.

00:03:34 Speaker 2

Are we going to do this incrementally and release a little at a time?

00:03:40 Speaker 2

Or are we going to hold it all back until everything's finished and release it all at once?

00:03:46 Speaker 2

That doesn't usually work.

00:03:47 Speaker 2

I wouldn't think we're going to release it at once.

00:03:49 Speaker 1

I mean, not everything is going to be done in version one, but we're going to have to cut off 360 and they would only be on the new product.

00:03:59 Speaker 2

Let me rephrase my question.

00:04:02 Speaker 2

When I say release, let me let me replace release with test.

00:04:09 Speaker 2

So we don't wanna hold back, hold back, hold back, and then release the whole system to the testing, you know, the testing department.

00:04:24 Speaker 2

It would just overwhelm everybody.

00:04:27 Speaker 2

I mean, typically.

00:04:29 Speaker 1

Yeah, I'm 100% with you, Jim.

00:04:32 Speaker 1

Sorry, Conrad.

00:04:33 Speaker 1

And that is the plan.

00:04:34 Speaker 1

So we will be doing it in multiple.

00:04:38 Speaker 1

sprints.

00:04:40 Speaker 1

And what we are thinking is we are going to divide the whole thing in sprints in such a way that we cover one or two features every sprint.

00:04:52 Speaker 1

I don't know if our sprint is going to be large enough to fit the whole feature in one sprint, but given the amount of time which we have, I think we want to get multiple

00:05:09 Speaker 1

streams or multiple stories get started so that we are attacking multiple sites and multiple features at the same time.

00:05:17 Speaker 1

That said, I want to make sure that whatever feature we touch, we need to complete that feature so that we don't need to come back and rework on that particular feature.

00:05:29 Speaker 1

So from that standpoint, I want to be very, very careful at the same time.

00:05:37 Speaker 1

We need to be thorough in our approach to ensure that we have done it end-to-end.

00:05:44 Speaker 1

And that said, the objective is to, when you're talking about the database or the data script, when we are looking at or when we are planning to look at that, what I will appreciate doing that is covering, give me one moment, guys.

00:06:08 Speaker 2

I missed that.

00:06:09 Speaker 2

What?

00:06:11 Speaker 2

give me a minute.

00:06:12 Speaker 2

I get it.

00:06:13 Speaker 2

OK.

00:06:15 Speaker 1

Sorry, the next door meeting room was a little bit louder, so I thought only I can be louder.

00:06:24 Speaker 1

That's right.

00:06:27 Speaker 1

Me too.

00:06:31 Speaker 1

So.

00:06:33 Speaker 1

Basically, what we are trying to focus on is, one or two areas or focus areas, we can call them features, high-level features, and we can focus on those features and, go, down from there.

00:06:53 Speaker 1

The one or the key feature which we have identified, or the rather, I should say,

00:07:00 Speaker 1

One of the most central feature which I can think about is the feature where we will be developing the employee module.

00:07:15 Speaker 1

That means anything, everything employee related.

00:07:19 Speaker 1

Of course, payroll, I'll keep it for a later stage.

00:07:22 Speaker 1

When we reach the payroll feature, then we'll talk about the payroll.

00:07:27 Speaker 1

When we reach the timesheet, then we'll talk about the timesheet.

00:07:30 Speaker 1

But the very first and very central entity in this entire picture is the employee, and that is where I think we can get started from.

00:07:42 Speaker 1

So if you're talking about the data, it'll be a good idea to pick up the pick up the the employee aspect of this thing.

00:07:54 Speaker 2

OK, I agree with everything you said and so.

00:07:59 Speaker 2

And I will.

00:08:03 Speaker 2

I will try like crazy to get the.

00:08:08 Speaker 2

Get the SQL create statements done today.

00:08:14 Speaker 2

And boy, oh boy, oh boy.

00:08:17 Speaker 2

You guys can't even log in yet, can you?

00:08:20 Speaker 2

The VPN.

00:08:23 Speaker 2

I talked to Michael this morning and he said, Ruanne.

00:08:28 Speaker 2

hasn't gotten you guys a login.

00:08:30 Speaker 2

There's there's another way.

00:08:32 Speaker 2

You guys are in an office, correct?

00:08:38 Speaker 2

Can you give me your public IP address and I'll whitelist it and I can give you a secure shell login without the VPN until we get you going the other way because

00:08:59 Speaker 2

Yeah, the admin on that.

00:09:05 Speaker 2

Hosted system is out of our hands, but if I can get you on our development box and then turn right around and push you over to your your machine, then I can get you on this morning and at that point.

00:09:24 Speaker 2

you can start looking at pay plus data.

00:09:29 Speaker 2

And So what I would need is just send an e-mail to support and send us your public IP address.

00:09:39 Speaker 2

It is static, I assume.

00:09:44 Speaker 2

You have a.

00:09:45 Speaker 3

They do.

00:09:46 Speaker 3

They have a static IP.

00:09:48 Speaker 3

I actually put in a ticket.

00:09:50 Speaker 3

Yeah, I'm sorry I'm a little late.

00:09:52 Speaker 3

I actually did put in a ticket to Flex and they said that they've not seen any server requests come from any of the address logins that I set up for Orange.

00:10:07 Speaker 2

Wow.

00:10:09 Speaker 3

So it's not getting out of there.

00:10:12 Speaker 3

out of their facility for some reason.

00:10:14 Speaker 3

So I just yesterday was a very busy day, so I didn't have time to come back to anybody.

00:10:20 Speaker 2

Oh, no, I wasn't slamming you.

00:10:22 Speaker 2

I wasn't slamming you.

00:10:23 Speaker 3

Yeah, it's OK.

00:10:24 Speaker 3

No, it's OK.

00:10:25 Speaker 3

Yeah, no, no, it's OK.

00:10:27 Speaker 3

It's OK.

00:10:28 Speaker 3

I mean, I it was on my list of things to do, but you know, other things happened, right?

00:10:32 Speaker 3

But but anyway, I did.

00:10:34 Speaker 3

Like I said, I do have a ticket open with Flexennial and.

00:10:40 Speaker 3

that, like I said, they said that they don't see any activity coming from those user address, from those usernames.

00:10:47 Speaker 2

So would they see it if it was blocked at the firewall?

00:10:50 Speaker 3

If it was blocked at Flex's firewall, it would be, but I verified that there is no foreign entity blocking or anything like that on our firewall.

00:11:04 Speaker 3

So that's not the issue.

00:11:06 Speaker 3

Yep, Okay.

00:11:08 Speaker 3

So it's gotta be on, it's gotta be on Orange's side.

00:11:12 Speaker 1

Gotcha, Luan, will it help?

00:11:14 Speaker 1

So 2 things, Aditya, did we, Aditya, did we share the video recording with Luan or just the screenshots?

00:11:23 Speaker 1

No, the screenshots, although they were pretty definitive because...

00:11:29 Speaker 1

That's fine, that's fine.

00:11:30 Speaker 1

So Luan, what we will do is 2 things.

00:11:34 Speaker 1

Number one, we will share our static IP and I believe we have shared it with you, but do you think using that static IP will be of?

00:11:49 Speaker 1

Of any help for this entire configuration?

00:11:54 Speaker 1

If yes, well for.

00:11:55 Speaker 3

For Conrad's it will, but but I don't know if that's the best way to give you access, but you know that that's fine with me.

00:12:02 Speaker 3

If he wants to have you go in through the back door, eventually that back door is not going to be available to us anymore.

00:12:08 Speaker 3

So we need to get it resolved so that you have the VPN access.

00:12:13 Speaker 3

But I agree, but that could get him access today.

00:12:16 Speaker 3

Yes, exactly, exactly.

00:12:18 Speaker 2

So now

00:12:19 Speaker 2

Now, in addition, another thing that Michael brought up that I think could be a good idea is if we sent one of the little appliances, send it to India, and then you can plunk this down on your land and have PayPlus on your land.

00:12:46 Speaker 2

Anybody?

00:12:49 Speaker 2

Luanne thought it sounded positive.

00:12:54 Speaker 3

Yeah, I didn't want to know today.

00:12:56 Speaker 2

It's not for today, right?

00:12:58 Speaker 3

But long term, but it might be a might be.

00:13:01 Speaker 3

Yeah, I agree.

00:13:03 Speaker 3

So they would have to continue to maintain it, though, make sure they put the updates on all that kind of stuff.

00:13:09 Speaker 4

But yeah, well, yeah, we could reach out and work with them as well.

00:13:13 Speaker 4

Yeah, but yeah, they.

00:13:14 Speaker 1

You and tell me what is the first.

00:13:18 Speaker 1

Sorry, Michael, complete your thought.

00:13:22 Speaker 3

The first completed part.

00:13:26 Speaker 1

No, I was saying, Michael, complete your thoughts.

00:13:29 Speaker 3

Oh, I'm sorry.

00:13:30 Speaker 4

No, well, okay, no, so short story is, yeah, we'll send you a basically a hardware device.

00:13:36 Speaker 4

You'll have a machine, I mean, there's little nooks, but you can actually have a local copy of the same thing you're trying to reach through the cloud to get to.

00:13:46 Speaker 4

OK, you get that paid plus locally at work off.

00:13:49 Speaker 4

You have your own lab like we do with a local machine.

00:13:55 Speaker 4

Yeah, but then we can SSH into it if you provide us the right route through your firewalls and then we can actually kind of work that way.

00:14:01 Speaker 4

That's the way Conrad and I are working now, you know, and that was where my idea came from.

00:14:05 Speaker 4

So anyway, gotcha.

00:14:07 Speaker 1

So I think that's a good idea.

00:14:10 Speaker 1

And for long term, we should definitely explore that option.

00:14:15 Speaker 1

But, since that is not going to be done, like today, right?

00:14:21 Speaker 1

so, Luen, I was gonna check what is the first opening you have on your calendar, so that we can, spend about 15-20 minutes in trying to do it together.

00:14:33 Speaker 1

I'm thinking we are probably doing something wrong.

00:14:36 Speaker 1

And before I try it with you, I'll do it myself and see if I run into any roadblocks.

00:14:46 Speaker 1

So I'll try first and then whatever time is open on your calendar, we'll block that and see if that helps.

00:14:54 Speaker 3

I do not have anything.

00:14:55 Speaker 3

No, I have no meetings on my calendar at all today after our meeting here and our standup meetings.

00:15:03 Speaker 3

Yeah, I'm open anytime you want to try.

00:15:06 Speaker 1

Beautiful.

00:15:06 Speaker 1

So we'll probably just do it.

00:15:09 Speaker 1

Oh, you don't have a 830?

00:15:12 Speaker 3

Well, we have the 830 together, all of us.

00:15:14 Speaker 3

Yeah.

00:15:14 Speaker 1

OK, So, yeah, so what time will you be out from the 830?

00:15:21 Speaker 3

Well...

00:15:22 Speaker 3

We're on the 830 meeting right now.

00:15:24 Speaker 3

We're going to have our meeting after your meeting concludes.

00:15:30 Speaker 3

When this meeting concludes, then we're going to do our usual stand up meeting and our development meeting.

00:15:37 Speaker 1

Gotcha.

00:15:38 Speaker 1

So yeah, Luanne, so I am trying to understand what is the first time I can block on your calendar after your meeting is done.

00:15:47 Speaker 1

that's fine.

00:15:49 Speaker 1

That's fine with me.

00:15:52 Speaker 3

I don't mind taking up this time if you guys don't want to, if you'd like to.

00:15:57 Speaker 1

Yeah, because that is a blocker.

00:15:59 Speaker 1

Let's give it a try.

00:16:00 Speaker 4

Well, technically, Jim is out and Susan's out.

00:16:03 Speaker 4

I'm not Jim.

00:16:04 Speaker 4

Steve is out and Susan's out.

00:16:06 Speaker 4

So all the players for our 830 meeting are on this call already.

00:16:10 Speaker 3

Yes, we are.

00:16:15 Speaker 1

Alright, so Aditya is gonna start sharing his screen and start doing it.

00:16:21 Speaker 1

OK, so go ahead.

00:16:26 Speaker 4

Thank you, Jim.

00:16:27 Speaker 1

Aditya, you don't have any VPN or anything active at this point in time, right?

00:16:32 Speaker 1

Nope.

00:16:32 Speaker 1

OK, perfect.

00:16:33 Speaker 3

The only thing he's got is he's on this meeting and sometimes.

00:16:38 Speaker 3

that is kind of, you might lose connection.

00:16:41 Speaker 3

These VPNs are full VPNs.

00:16:44 Speaker 3

So they're going to take, they take over all the network traffic wherever it's going.

00:16:50 Speaker 3

Okay.

00:16:50 Speaker 1

Absolutely.

00:16:51 Speaker 1

Yeah.

00:16:51 Speaker 3

Kind of like how it was at COAD.

00:16:54 Speaker 1

Sure.

00:16:54 Speaker 1

I understand.

00:16:56 Speaker 3

Now that all looked, that all looked fine.

00:16:58 Speaker 3

I mean, I was, you know, I thought for sure that one of those settings was the issue, but.

00:17:05 Speaker 3

Yeah, looks fine.

00:17:06 Speaker 1

We need to select any client certificates or anything like that.

00:17:10 Speaker 3

No, we do not have any certificates.

00:17:12 Speaker 3

No, OK, no certificates.

00:17:15 Speaker 3

So now you have to just, yeah, just put.

00:17:19 Speaker 1

In the cancel it out and put in the password and hit connect.

00:17:26 Speaker 1

I need to log into mail first.

00:17:49 Speaker 3

I probably could have told you what they were.

00:17:53 Speaker 1

Yeah, I'm feeling the same.

00:17:56 Speaker 3

Yeah.

00:17:58 Speaker 3

So the whole password is all lowercase.

00:18:01 Speaker 3

They're all lowercase.

00:18:03 Speaker 3

So, yeah.

00:18:06 Speaker 3

So that's PWD4AJL99.

00:18:14 Speaker 1

Here's this one.

00:18:17 Speaker 1

Got it.

00:18:30 Speaker 3

Oh, you're not sharing?

00:18:31 Speaker 3

I can't see your entire screen, so, but, and see, that's the, that's what it's doing.

00:18:36 Speaker 3

It's not, I don't even think it's getting out of your, out of your network.

00:18:42 Speaker 1

Hey, let me do this thing.

00:18:44 Speaker 1

So, first step is to, Aditya, what is the first step?

00:18:48 Speaker 1

Should I install the, yes, 40 client, yes, 40 client VPN?

00:18:53 Speaker 1

Yes, you just have to install it.

00:18:55 Speaker 1

Okay, and then it would ask for some configurations, so the configurations would be there.

00:18:59 Speaker 1

Can you try doing the same thing?

00:19:01 Speaker 1

Yes, okay.

00:19:07 Speaker 3

Yeah, I thought that it might be like either a firewall sitting on your side that is not that you have like some explicit things that let traffic through.

00:19:19 Speaker 1

I see two different applications available for the client VPN applications.

00:19:25 Speaker 3

Only the one that the direct link goes to.

00:19:28 Speaker 3

I sent a direct link.

00:19:30 Speaker 1

Got you.

00:19:31 Speaker 1

Okay.

00:19:32 Speaker 3

The other one is the paid version, the full version.

00:19:36 Speaker 3

You only want the regular, just the VPN.

00:19:40 Speaker 1

Okay.

00:19:41 Speaker 1

Add configuration.

00:19:48 Speaker 1

Okay, we are trying on one more PC just in case.

00:19:56 Speaker 1

Actually two more PCs, one PC, one Mac.

00:19:59 Speaker 1

We are trying on both of them in parallel.

00:20:01 Speaker 3

Well, I was going to suggest that if it's on a laptop, somebody take it home with them so you're not in your office.

00:20:09 Speaker 1

There's only this one.

00:20:11 Speaker 3

And try from a home, a home network outside of yours.

00:20:14 Speaker 3

I didn't know, I don't know what your configuration of your network looks like.

00:20:17 Speaker 1

So it's, actually pretty straightforward.

00:20:21 Speaker 1

And so there's, I don't think we have any blockages because we also use the VPN and wherever we need any specific configuration, we go through the VPN.

00:20:30 Speaker 1

So that way is very, very straightforward.

00:20:33 Speaker 3

Okay.

00:20:36 Speaker 1

So syntax.

00:20:39 Speaker 1

Thank you.

00:20:43 Speaker 1

Question name description to me.

00:20:57 Speaker 1

You have a.

00:21:08 Speaker 1

Aditi, can you try if there is a Chrome extension for 40 VPN?

00:21:15 Speaker 1

Let me check, but I don't think...

00:21:27 Speaker 1

Sorry guys, everybody is on the call and we are trying this, but...

00:21:49 Speaker 1

No, OK, so.

00:21:58 Speaker 1

I have it installed.

00:22:00 Speaker 1

If you can help me.

00:22:05 Speaker 1

VPN configuration name.

00:22:10 Speaker 3

And you can name it anything you want.

00:22:11 Speaker 3

It really doesn't matter.

00:22:16 Speaker 1

Right, I just do that.

00:22:17 Speaker 1

Yeah, this is the most important part, right?

00:22:20 Speaker 3

Yeah, I just do those names just for our clients, so that if when I send this out, they have something to put in there.

00:22:35 Speaker 3

Makes it easier for us if they're all the same.

00:22:39 Speaker 1

Yep.

00:22:41 Speaker 1

And the username is...

00:22:45 Speaker 1

Let's see.

00:22:52 Speaker 1

Correct.

00:23:03 Speaker 1

This is OK and.

00:23:26 Speaker 1

I don't know what's going on over here.

00:23:31 Speaker 1

Looks like mine is connected.

00:23:37 Speaker 1

No, we just lost 10% and it stops.

00:23:40 Speaker 1

No, looks like mine is connected.

00:23:42 Speaker 1

It's OK.

00:23:44 Speaker 1

Let me share my screen, Duane.

00:23:46 Speaker 3

OK.

00:23:51 Speaker 1

It's a MAC connection, so it may look different in it.

00:23:56 Speaker 3

Okay.

00:23:57 Speaker 3

Well, at least we know that it is connecting now, so it didn't have anything to do on that side.

00:24:14 Speaker 3

It has to either be on the computer that was installed on, or there had to be something else blocking it.

00:24:22 Speaker 1

Yeah, sorry.

00:24:25 Speaker 3

Now, when you do get, you got connected, did you get the certificate coming up and saying allow access?

00:24:32 Speaker 1

No, not yet.

00:24:35 Speaker 1

So this is the guy I have.

00:24:40 Speaker 3

Oh, you're not connected yet?

00:24:42 Speaker 1

It's like I see.

00:24:43 Speaker 3

Okay.

00:24:44 Speaker 1

But the traffic, I can see the traffic, right?

00:24:46 Speaker 1

Connection time and the traffic.

00:24:48 Speaker 3

Yes.

00:24:49 Speaker 3

Okay.

00:24:49 Speaker 3

So it didn't, so you know, that must be a, that must be a Microsoft thing.

00:24:53 Speaker 3

where it's, it's making you verify the server when you're using a Microsoft computer.

00:25:06 Speaker 3

Comes up with a little box that says there's a server, the server connection.

00:25:10 Speaker 3

You have to approve the connection.

00:25:14 Speaker 1

Yeah.

00:25:16 Speaker 3

Okay.

00:25:16 Speaker 3

All right.

00:25:18 Speaker 3

So if you go to your File Explorer.

00:25:21 Speaker 1

Yep.

00:25:22 Speaker 3

And then type in the server address.

00:25:26 Speaker 3

What was the server address?

00:25:27 Speaker 3

I can't remember now.

00:25:30 Speaker 1

This is the server and this is the server address 10 dot 10 dot two.

00:25:35 Speaker 3

Yes, that's it.

00:25:47 Speaker 1

10 dot 10 dot.

00:25:56 Speaker 3

Do you have to put the backslashes in front of it?

00:26:09 Speaker 1

I think what I need to do here is…

00:26:14 Speaker 2

I wonder if…

00:26:16 Speaker 3

Well, at least we know that the connection's working now, so…

00:26:20 Speaker 1

Yeah, definitely.

00:26:22 Speaker 2

What is your IT config look like?

00:26:27 Speaker 2

IP config slash all.

00:26:29 Speaker 2

Do you have a 10.0 network?

00:26:35 Speaker 2

I don't.

00:26:36 Speaker 2

I'm sorry, 1010 network.

00:26:39 Speaker 1

My IP config is going to be different.

00:26:43 Speaker 3

He has a Mac, so it's different.

00:26:45 Speaker 2

Oh, he has a Mac.

00:26:46 Speaker 1

Oh, okay.

00:26:47 Speaker 1

I have config.

00:26:49 Speaker 1

No, Mac won't make a difference from IP.

00:26:52 Speaker 2

Yeah.

00:26:53 Speaker 2

Okay.

00:27:01 Speaker 1

What happened to my console?

00:27:20 Speaker 3

I can't help you there.

00:27:20 Speaker 3

I'm not a Mac genius.

00:27:22 Speaker 1

Never mind.

00:27:22 Speaker 1

So, yeah, one, at least one thing we got across.

00:27:27 Speaker 1

So let me, you know, verify it offline and Luana, I'll ping you as I make for the progress.

00:27:36 Speaker 1

I will take everybody's time on this.

00:27:39 Speaker 1

If this is us, then we'll figure it out.

00:27:42 Speaker 3

Sure.

00:27:43 Speaker 3

Well, yeah, just check back with me when you've got some time.

00:27:46 Speaker 3

I'm here all day.

00:27:47 Speaker 1

Will do.

00:27:48 Speaker 1

Yeah.

00:27:48 Speaker 1

All right, team, thank you so much and have a wonderful weekend.

00:27:54 Speaker 1

We'll see you on Monday.

00:27:55 Speaker 1

OK.

00:27:57 Speaker 2

And I'm going to send you, I just.

00:28:02 Speaker 2

I already wrote this script.

00:28:04 Speaker 2

There's one gotcha with the field names.

00:28:09 Speaker 2

Thoroughbred Basic is COBOL for all intents and purposes, and it allows dashes in the field names.

00:28:18 Speaker 2

And for most of the programs I use, dashes are not, they're nasty characters, right?

00:28:27 Speaker 2

That means subtraction.

00:28:29 Speaker 2

So all of the dashes in the field names have been converted to underscores.

00:28:36 Speaker 2

It really shouldn't matter, but all I need to do is zip this up for you and I can send this right now.

00:28:46 Speaker 2

I've got SQL create statements, but this won't really help you until we talk about

00:28:54 Speaker 2

Which tables do you need?

00:28:56 Speaker 2

You honestly don't need all of this stuff.

00:28:59 Speaker 2

Absolutely.

00:28:59 Speaker 1

Yeah.

00:29:01 Speaker 2

So I agree.

00:29:02 Speaker 1

I completely.

00:29:03 Speaker 1

Yeah.

00:29:06 Speaker 2

OK.

00:29:08 Speaker 2

Slash temp slash nacho.

00:29:14 Speaker 2

A plus.

00:29:20 Speaker 2

Filed dot zip.

00:29:24 Speaker 2

And I just want the nacho.

00:29:29 Speaker 2

Not macho.

00:29:31 Speaker 2

Maybe we should rename this?

00:29:34 Speaker 3

No.

00:29:34 Speaker 2

I'm just jokes.

00:29:40 Speaker 2

LLRT slash temp.

00:29:46 Speaker 2

OK, I'll e-mail these right now to you and.

00:29:51 Speaker 2

I, maybe I should go look at one of these.

00:29:55 Speaker 2

I'll get these to you ASAP.

00:29:57 Speaker 2

I haven't, I haven't even looked at the output, so maybe I should do that.

00:30:09 Speaker 1

Okay.

00:30:10 Speaker 1

And by the way, from the other laptop, it did not work.

00:30:16 Speaker 1

So, yeah, finish your meeting and then we'll pick it up again.

00:30:23 Speaker 1

You can drop me a note maybe once you're done.

00:30:26 Speaker 3

I'll do it.

00:30:27 Speaker 1

And yeah.

00:30:30 Speaker 1

Thank you.

00:30:31 Speaker 3

All right.

00:30:33 Speaker 1

Good you guys.

00:30:34 Speaker 1

Bye bye.

00:30:35 Speaker 3

See our crew on the flip side?

00:30:37 Speaker 4

All right, let's go sing now.

00:30:39 Speaker 3

Okay, bye.
